

# *CLIPDRIVE* **TRAINING 2021 GUIDE**

Stand tall, target screws easily, and drive clips up to 5X faster with the CAMO ClipDRIVE™, the contractor-grade tool designed to give you the best experience fastening grooved decking.

# How to Fasten with CLIPDRIVE

## BEFORE YOU BEGIN

Lay down rows of boards and clips and hold or lock them in place.

## Setup for Clip fastening

### A INSTALL T-15 DRIVER BIT

Separate the tool by turning the upper tool body counter-clockwise and sliding the locking pins out of the notches.

Pull back the collar, then insert the T-15 bit and release the collar to lock the bit in place.

### B CONNECT TOOL BODY

Align the notches in the upper tool body with the locking pins and push down while turning to lock into place.

Turn the upper tool body clockwise to lock it into place.

### C INSTALL THE HANDLE

Loosen the handle by turning it counter-clockwise and slide the clamp onto the tool.

Position the handle on the upper tool body and tighten by turning the handle clockwise.

### D ATTACH YOUR DRILL + SET TORQUE

Make sure the drill is set in the forward position. Insert the large collar of the drive shaft into the drill chuck and tighten.

If your drill has a drill and clutch mode, set it to clutch mode. Set your drill to 30% of maximum torque.

### 1 POSITION NOSE OVER CLIP

Starting at the outermost board, place the nose over the exposed screw.

### 2 ENGAGE DRILL

With the nose flat on the surface of the board, and pressure on the handle, run the drill at full speed, and push the driver drill down to engage the bit and screw.

### 3 FASTEN THE BOARD

Apply steady pressure and continue to drive until the drill clutch releases.

### 4 LIFT UP TOOL

After fastening, lift up on the tool to return your drill to starting position.

### 5 FASTEN EVERY JOIST

Fasten all of the remaining clips at each joist.
