PATENTED

DECKFAST® Fascia System for PVC and composite deck fascia boards is designed to accommodate the large amount of expansion and contraction that can occur with deck fascia. The precisely engineered Fascia System has two components: the patented pre-drilling and countersinking Fascia Tool and specially designed, color matched, Fascia Screws.

The Fascia Tool creates an over-sized hole for the Fascia Screw, so that the fascia board hangs from the screw without applying a large amount of force on the fastener. Fascia Screws are available in both Headcote® stainless steel or epoxy coated carbon steel.

Approved for use with ACQ treated lumber. Follow the decking manufacturer's recommendation when selecting either stainless or epoxy coated screws. For applications exposed to salt air, near large bodies of water, swimming pools or other areas where corrosion is more likely to occur, use Headcote® 316 or Headcote® Cap-Tor® xd 316.

FASCIA TOOL

Free Spinning Stop Collar with O-ring

The stop collar spins free of the drill bit, preventing marring or burnishing of the fascia board surface. When the stop collar stops spinning, the hole is complete.

Pre-set Countersink

The Fascia Tool matches the head diameter and countersink depth of the Fascia Screw for the perfect hole and fit. Everything is pre-set in the tool assembly.

Anti-clog Debris Cavity

The cavity gathers waste material, keeping it clear of the countersink.

Pre-set Shaft Length

Together with the countersink, the overall hole depth is designed for use with fascia boards from 1/2" to 3/4" thick.

FASCIA SCREWS

Color Matched Stainless Steel and Epoxy Coated Steel

Fascia screws are available in a wide range of colors to match popular decking products. Stainless Fascia Screws are 9 x 1-7/8". Epoxy Coated Fascia Screws are 10 x 1-7/8".

T-20 Star Drive Recess

Favored by professionals.

Type 17 Auger Tip

For faster, easier entry; helps prevent splitting of treated lumber.

PACKS

FASCIA SCREWS
Stainless Steel
100 pc
