## SteelRenewal™ Stainless Steel Cleaner

### INSTRUCTIONS

1. Apply undiluted cleaner with a sprayer, brush, or roller to the surface to be treated
2. Allow the cleaner to soak for at least 6 hours and up to 24 hours for heavier rusting
3. Rinse the surface with water
4. If necessary, repeat the treatment with a longer soak time

## SteelProtect™ Stainless Steel Protectant

### INSTRUCTIONS

Note: Use SteelProtect™ regularly on your stainless steel surfaces to help prevent corrosion and on areas treated with SteelRenewal™ to provide a post treatment protective layer

1. Dilute 1 part solution with 2 parts **cold** water
2. Apply generously with a cloth or sponge
3. Allow to dry
4. Check surface for any remaining residue
5. Repeat steps 3-4 until the surface is completely clean and no shading is visible
6. Clean excess solution by rinsing with cold water
